

This is the ECG of a 46 year-old man who complains of sudden onset of chest pain. He is quite distressed and hypotensive.

QUESTION: Which ONE of the following is the most likely diagnosis?

- (a) Acute inferior myocardial infarction with right ventricular involvement
- (b) Acute pericarditis
- (c) Acute pulmonary vascular condition
- (d) Acute aortic dissection
- (e) Acute coronary syndrome

Please analyse the ECG carefully and commit yourself to an answer before checking the explanation.
